

DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

INDIANAPOLIS

OFFICE MEMORANDUM

DATE: January 21, 2005

TO: File

FROM: Steve Mojonier  
Rules, Planning and Outreach Section, Office of Land Quality

SUBJECT: General Motors Corporation Fort Wayne Assembly Plant F019 Wastewater Treatment Sludge Delisting; Cost to Regulated Entities; LSA Document #05-85

Under IC 4-22-2-28, IDEM has estimated that the cost to regulated entities of the proposed new rule at 329 IAC 3.1-6-7 to delist F019 wastewater treatment sludge generated by General Motors Fort Wayne Assembly Plant (the petitioner) will be less than five hundred thousand dollars (\$500,000). The economic impact analysis for this rule will not be submitted to the Legislative Services Agency. The analysis of the economic impact on regulated entities prepared for this rule is attached.

***Analysis of Economic Impact***

General Motors Corporation Fort Wayne Assembly Plant F019 Wastewater Treatment Sludge Delisting, Fort Wayne, Indiana LSA Document #05-85

**Digest of Proposed Rule**

Adds 329 IAC 3.1-6-7 to conditionally exclude from regulation under 329 IAC 3.1 wastewater treatment sludge from the chemical conversion coating of aluminum, hazardous waste code F019, that is generated by General Motors Corporation at the Fort Wayne Assembly Plant, Fort Wayne, Indiana.

**Effective date of proposed rule**

Effective 30 days after filing with the secretary of state. The effective date is estimated to be March 2006.

**Requirements of the proposed rule**

This rule would exclude from regulation under 329 IAC 3.1 (delist) wastewater treatment sludges from the chemical conversion coating of aluminum, waste code F019, that is

generated by General Motors Fort Wayne Assembly Plant, in accordance with the petition for delisting submitted by General Motors on September 20, 2004.

### **Regulated entities affected by the proposed rule**

General Motors Corporation, Fort Wayne Assembly Plant.

### **Narrative discussion of fiscal impact**

This rule would result in an annual savings of \$104,334 to the regulated entity (petitioner), based on information provided by the petitioner. The U.S. Environmental Protection Agency has an ongoing rulemaking project to remove wastewater treatment sludges from the chemical coating of aluminum from the F019 waste code listing, which would make this delisting superfluous. IDEM anticipates completion of the EPA rulemaking within the next 2-3 years.
